

PROSPER P. BOWMAN

Philadelphia, PA | 267-249-1001 | ppb39@drexel.edu | [Handshake](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Cybersecurity and IT graduate student at Drexel University with hands-on experience in AI-driven security automation, data analysis, and risk assessment. Proficient in Python scripting, SQL querying, and security frameworks including NIST CSF. Demonstrated ability to research emerging technologies, identify risk use cases, prototype solutions, and communicate findings to stakeholders. Seeking to apply analytical and technical skills in AI innovation and risk management.

EDUCATION

M.S. in Cybersecurity Expected June 2027
Drexel University — Philadelphia, PA | GPA: 4.0 / 4.0

B.S. in Information Technology November 2023
BlueCrest University College — Liberia | GPA: 3.75 / 4.0

TECHNICAL SKILLS

AI & Data: Python (ML scripting, automation), SQL (data correlation & analysis), Data-driven decision-making
Risk & Security: NIST CSF, Vulnerability Assessment, SIEM Monitoring, Incident Response, Audit Reporting
Tools & Platforms: Nessus, Wireshark, Nmap, Tcpdump, Git/GitHub, Linux (Ubuntu/Debian), Windows
Other: JavaScript, Bash, HTML5, CSS, PKI, TLS/SSL, VLAN Segmentation

AI & RISK MANAGEMENT PROJECTS

Security Automation with Python & AI

- Developed Python scripts to automate security tasks, streamline incident investigations, and reduce manual workload — directly applying AI-driven process improvement to risk operations.
- Executed SQL queries to correlate and analyze security incidents from database logs, enabling data-driven risk insights and faster decision-making.
- Performed forensic log analysis using Linux CLI tools to trace attack activity, documenting findings in formal incident response reports for stakeholders.

Vulnerability Assessment & Risk Mitigation

- Identified 15 vulnerabilities across systems using Nessus; authored prioritized risk reports with detailed remediation strategies aligned to business objectives and compliance requirements.
- Mitigated risks through TLS/SSL updates, PKI deployment, and VLAN segmentation — researching and applying emerging security technologies to reduce organizational exposure.

Network Traffic Analysis & Security Audit

- Captured and analyzed network traffic using Tcpdump and Wireshark to detect anomalies and compliance gaps against the NIST Cybersecurity Framework (CSF).
- Delivered comprehensive security recommendations and formal audit reports to senior stakeholders, communicating complex technical findings clearly and concisely.

PROFESSIONAL EXPERIENCE

Facilities Maintenance Technician Nov 2024 – Present
Center City District — Philadelphia, PA

- Created operational assessment reports and maintained accurate records in compliance with organizational data management procedures — demonstrating structured reporting and analytical discipline.
- Reviewed work orders to ensure separation of duties and proactively reported infrastructure issues, reinforcing risk awareness and process compliance.

Go-To-Market (GTM) Coordinator Aug 2023 – Jul 2024
QTRACO Promasidor Limited

- Coordinated cross-functional product launch activities across product, marketing, and sales teams; developed comprehensive GTM playbooks and managed full execution plans.
- Analyzed customer feedback data to refine go-to-market strategy, applying data-driven decision-making to support business objectives — directly transferable to AI use case prioritization in risk management.
